IMPORTANT INSTRUCTIONS

General Safety Instructions

Safety First: The primary concern of Midmark Corporation is that this table is maintained with the safety of the patient and staff in mind. To assure that services and repairs are completed safely and correctly, proceed as follows:

(1) Read this entire manual before performing any services or repairs on this table.

(2) Be sure you understand the instructions contained in this manual before attempting to service or repair this table.

Safety Alert Symbols

Throughout this manual are safety alert symbols that call attention to particular procedures. These items are used as follows:

DANGER

A DANGER is used for an imminently hazardous operating procedure, practice, or condition which, if not correctly followed, will result in loss of life or serious personal injury.

WARNING

A WARNING is used for a potentially hazardous operating procedure, practice, or condition which, if not correctly followed, could result in loss of life or serious personal injury.

CAUTION

A CAUTION is used for a potentially hazardous operating procedure, practice, or condition which, if not correctly followed, could result in minor or moderate injury. It may also be used to alert against unsafe practices.

EQUIPMENT ALERT

An EQUIPMENT ALERT is used for an imminently or potentially hazardous operating procedure, practice, or condition which, if not correctly followed, will or could result in serious, moderate, or minor damage to unit.

NOTE

A NOTE is used to amplify an operating procedure, practice or condition.

Warranty Instructions

Refer to the Midmark “Limited Warranty” printed in the Installation and Operation Manual for warranty information. Failure to follow the guidelines listed below will void the warranty and/or render the 400 Series Casework Products unsafe for operation.

- In the event of a malfunction, do not attempt to operate the table until necessary repairs have been made.
- Do not attempt to disassemble table, replace malfunctioning or damaged components, or perform adjustments unless you are one of Midmark’s authorized service technicians.
- Do not substitute parts of another manufacturer when replacing inoperative or damaged components. Use only Midmark replacement parts.

SECTION VI
PARTS LIST

6.1 Introduction

The illustrated parts list provides information for identifying and ordering the parts necessary to maintain the unit in peak operating condition. Refer to paragraph 1.5 for parts ordering information.

The parts list also illustrates disassembly and assembly relationships of parts.

6.2 Description of Columns

The *Item* column of the parts list gives a component its own unique number. The same number is given to the component in the parts illustration. This allows a part number of a component to be found if the technician can visually spot the part on the illustration. The technician simply finds the component in question on the illustration and notes the item number of that component. Then, he finds that item number in the parts list. The row corresponding to the item number gives the technician the part number, a description of the component, and quantity of parts per subassembly. Also, if a part number is known, the location of that component can be determined by looking for the item number of the component on the illustration.

The *Part No.* column lists the MIDMARK part number for that component.

The *Description* column provides a physical description of the component.

The *Qty.* column lists the number of units of a particular component that is required for the subassembly. The letters “AR” denote “as required” when quantities of a particular component cannot be determined, such as: adhesive.

Bullets { • } in the *Part No.* column and the *Description* column show the indenture level of a component. If a component does not have a bullet, it is a main component of that illustration. If a component has a bullet, it is a subcomponent of the next component listed higher in the parts list than itself that does not have a bullet. Likewise, if a component has two bullets, it is a subcomponent of the next component listed higher in the parts list than itself that has only one bullet.

6.3 Torque Specifications and Important Assembly Notes

When specific assembly torque specifications, measurements, or procedures have been identified, by our engineering department, as required to assure proper function of the unit, those torque specifications measurements, and procedures will be noted on the parts illustrations. Adherence to these requirements is essential.

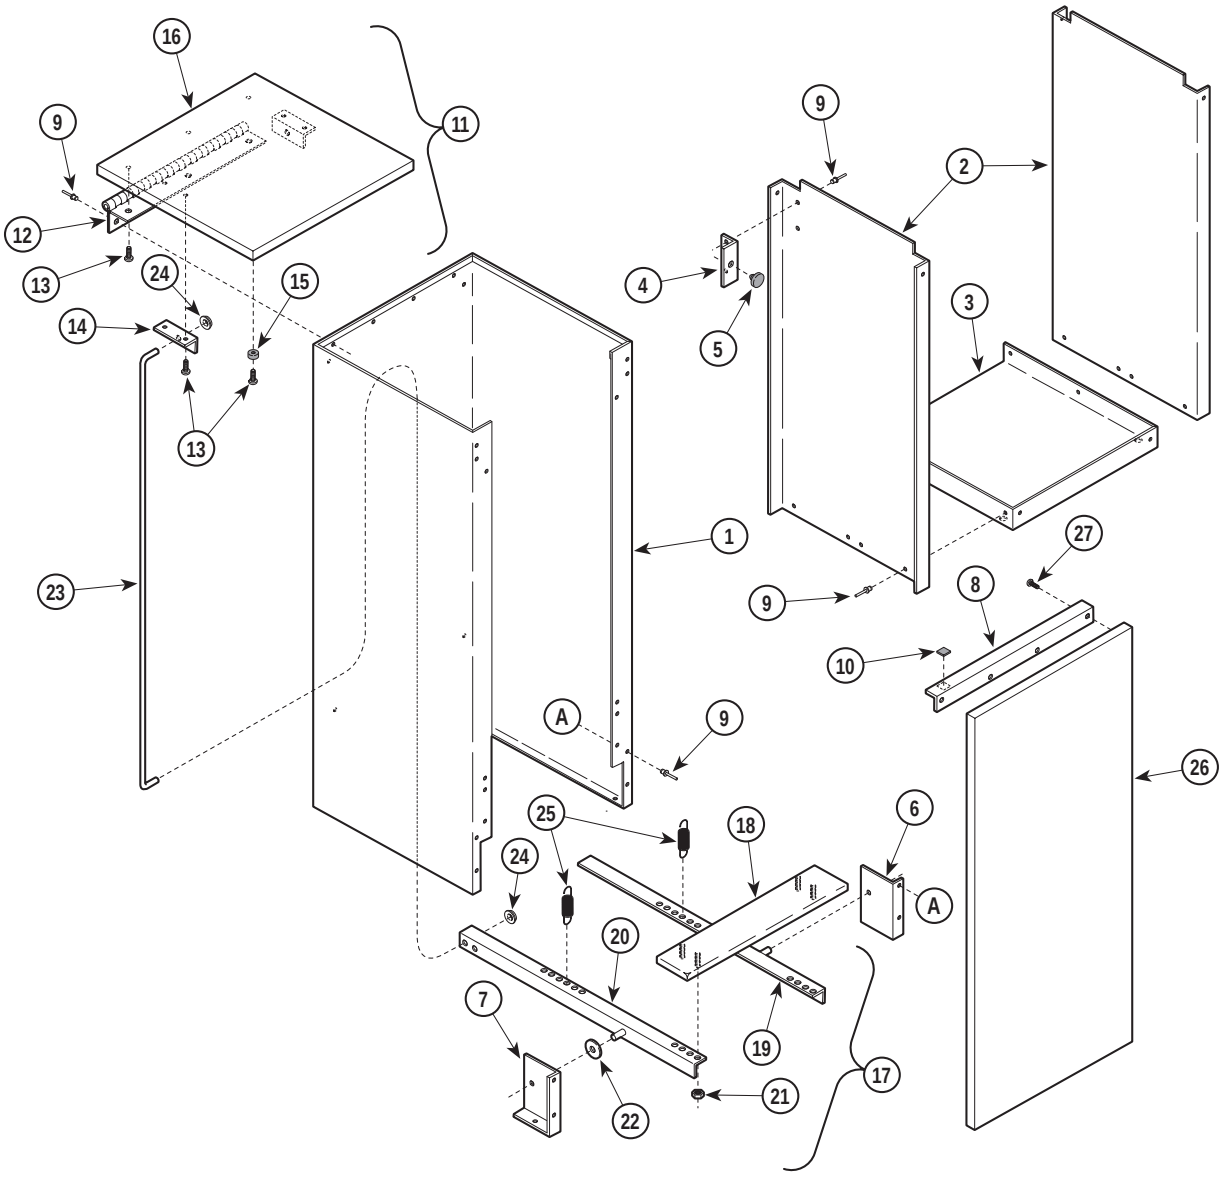
Waste Receptacle 430-001



MA332500

Used On Units With Serial Number M30580 thru Units Built Until 11-1-92

Item	Part No.	Description	Qty.
	430-001	Waste Receiver - [Pearl Grey] (Includes Items 1 thru 28)	1
1	• 050-0081-01	• Waste Receiver Wrap	1
2	• 050-0253-01	• Waste Receiver Liner	2
3	• 050-0082-01	• Waste Receiver Bottom	1
4	• 050-0255-22	• Rod Stop Bracket (Early Units Only)	2
5	• 053-0023-00	• Plug Bumper (Early Units Only)	2
6	• 050-0083-10	• R.H. Lever Pivot Bracket	1
7	• 050-0084-10	• L.H. Lever Pivot Bracket	1
8	• 050-1574-00	• Lid Bumper Bracket	1
9	• 042-0010-03	• Pop Rivet	AR
10	• 053-0019-01	• Neoprene Pad	2
11	• 029-1232-00	• Waste Receiver Lid Assembly (Includes Items 12 thru 16)	1
12	• • 016-0005-01	• • Hinge	2
13	• • 040-0006-00	• • Screw	9
14	• • 050-0093-32	• • Lid Pivot Bracket	2
15	• • 053-0020-00	• • Recess Bumper	2
16	• • 062-2732-02	• • Waste Receiver Lid (Antique White)	1
17	• 029-0622-00	• Trip Lever Assembly (Includes Items 18 thru 20)	1
18	• • 030-0476-00	• • Trip Plate Weldment	1
19	• • 030-0477-30	• • R.H. Trip Lever Bracket Weldment	1
20	• • 030-0477-31	• • L.H. Trip Lever Bracket Weldment	1
21	• • 041-0005-00	• • Pal Nut	4
22	• 045-0001-00	• Washer	2
23	• 057-0006-32	• Throw Rod	2
